Simple Talk Article

<https://www.red-gate.com/simple-talk/collections/migrating-from-on-prem-to-the-cloud-dba-stories/>

Agenda

- What's the big deal? With Migrations?
- Skeletons in the closet
- Downtime?!?!?!?
- Tribute!
- Testing!
- Communication!
- Live/Observe
- Summary!

What's the big deal?

- Cost!
- Time!
- Effort!
- It's not easy!
- It's not Technical!
- Don't go alone!

Skeletons in the closet

- Gather the app list
- Organize/sort
- Ask the hard questions..
 - Do we need this?
 - Why do we need this?
 - Does anyone use this?
- You will not find them all

Downtime/Cutover

- First step!
 - Run in Parallel, migrate, test, migrate, test, migrate..
- Start communicating the time
- Rollback?
- What can cut down the time?
 - Static data?
 - Archived data?
 - Functionality not used?

Tribute!

- Who is going first?
- Are they right one to go first?
 - Size of application?
 - Criticality of the application?
 - Knowledge of the application?
- What are the rollback options?
- How much does it cost?

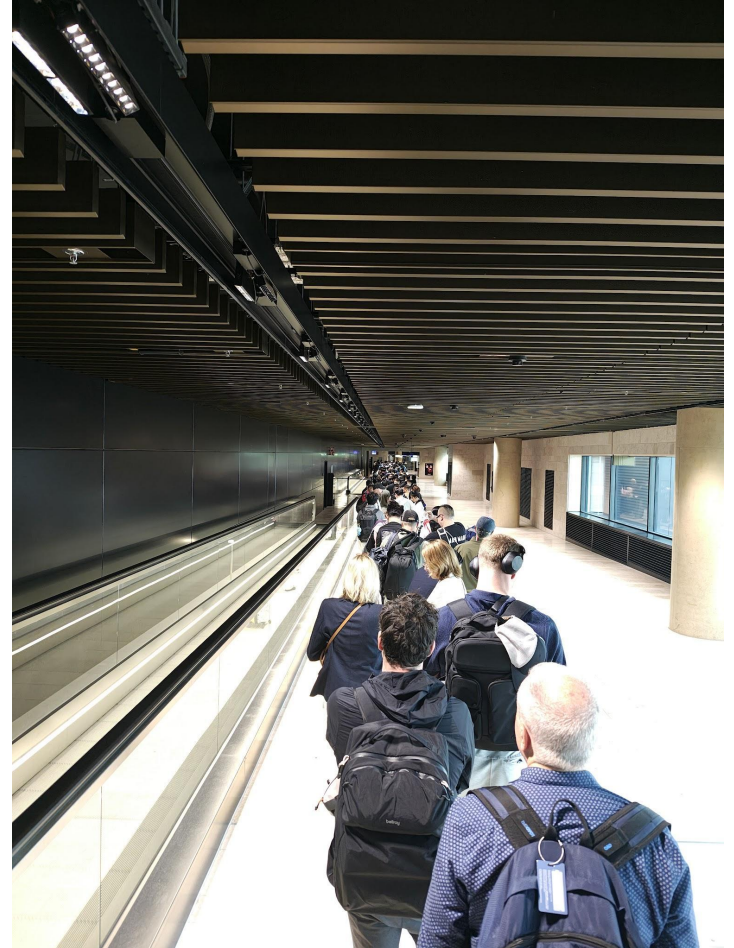

Testing application

- In parallel.
- Repeatable framework to run over and over again
- Prefer Pass/Fails for logic.

Communication

- Standing meeting
- Status updates
- Involve Everyone!
- Don't commit to a finish date

Going Live!

- All hands on Deck!
- Plan ahead, then adjust over and over.
- Step by step lists
- Ignore the costs, Fix the costs
- Optimize! Quickly!
- What is Complete/Rollback?

Summary

- Bigger Project than you believe
- Plan for repetition
- Communication is key
- Testing is key
- Communicate milestones not endings
- Repeat, a lot
